

METCHEM 6620

Synthetic Metalforming Lubricant

DESCRIPTION

METCHEM 6620 is a highly concentrated, synthetic lubricant designed for heavy-duty metalforming operations on ferrous and non-ferrous metals. The unique formulation of **METCHEM 6620** is designed as a base lubricant and sold in pre-determined, specific dilutions depending on application. (See Directions for Use)

BENEFITS

- Automotive approved
- Outstanding corrosion protection
- Excellent die life
- Easily cleaned off
- Weldable

APPLICATIONS

- Forming unpolished cold rolled steel alloys
- Forming galvanized and galvanized coil stock
- Forming 6000 series aluminum alloys
- Forming HSLA steels
- Forming automotive parts on progressive dies

SPECIFICATIONS

Specific Gravity @72° F... 1.10
pH, concentrate... 8.85
pH, 5% ... 8.55
Refractometer Multiplier... 1.3

DIRECTIONS FOR USE

METCHEM 6620 is sold as a pre-diluted solution and can be used as received or further diluted with water by end user according to specific application.

PACKAGING: **METCHEM 6620** is available in 5-gallon pails, 55-gallon drums or 330-gallon totes.

The Metalloid Partnership Advantage
